

Prof. Valeriu POPA
Department of Mathematics and Informatics

List of papers

General Topology

1973

1. V. Popa, A supra aplicațiilor monotone între spațiile bitopologice (On monotone functions between bitopological spaces), Stud. Cerc. Matem., 25, 2 (1973), 309 – 312.
2. V. Popa and C. Stan, A supra unei descompuneri a cvasicontinuității în spațiile topologice (On a decomposition of cvasicontinuity in topological spaces), Stud. Cerc. Matem., 25, 1 (1973), 41 – 43.

1975

3. V. Popa, A supra unei descompuneri a cvasicontinuității multifunțiilor (On a decomposition of cvasicontinuity for multifunctions), Stud. Cerc. Matem., 27, 3 (1975), 323 – 328.
4. V. Popa, Multifunctions and bitopological spaces, Bul. Soc. Șt. Mat. România, 19 (67), 1 – 2 (1975), 147 – 152.

1976

5. V. Popa, A supra M – produselor bitopologice conexe (On M – bitopological conexe products), Bul. Șt. Tehnic, Inst. Politehn. “T. Vuia”, Timișoara, Ser. Mat. Fiz. Mec. Teor. Aplicată, 2 (35) (1976), 134 – 140.

1978

6. V. Popa, A supra unei descompuneri a cvasicontinuității în spațiile topologice (On a decomposition of quasicontinuity in topological spaces), Stud. Cerc. Mat., 30, 1 (1978), 31 – 35.
7. V. Popa, A supra unor proprietăți ale multifunțiilor cvasicontinue și aproape continue (On some properties of quasicontinuous and almost continuous multifunctions), Stud. Cerc. Mat., 30, 4 (1978), 441 – 446.
8. V. Popa, A supra Weakly continuous multifunctions, Bull. U. M. I. 5, 15 – A, (1978), 379 – 388.

1979

9. V. Popa, Sur certain decomposition de la continuité dans les espaces topologique, Glasnik Mat. 14 (34) (1979), 361 – 364.
10. V. Popa, On some properties of bitopological semi – separate spaces, Mat. Vesnik, 3 (16) (31) (1979), 71 – 75.

1980

11. V. Popa, Multifunții H – aproape continue (Multifunctions H – almost continuous), Stud. Cerc. Mat. 32, 1 (1980), 103 – 109.

12. V. Popa, Caracterizări ale funcțiilor θ – continue (Characterizations of θ – continuous functions), Studii și Cercetări (Matem.), Bacău (1980), 113 – 119.
13. V. Popa, On some properties of weakly continuous multifunctions, Stud. Cerc. (Matem.), Bacău (1980), 121 – 127.
- 1981**
14. V. Popa, Asupra unor forme slăbite de continuitate (On some weak forms of continuity), Stud. Cerc. Mat., 33, 5 (1981), 543 – 546.
- 1982**
15. V. Popa, Caracterizări ale funcțiilor slab continue (Characterizations of weak continuous functions), Stud. Cerc. Mat., 34, 3 (1982), 277 – 280.
16. V. Popa, Multifunctions semi – continuous, Rev. Roumaine Math. Pure et Appl., 27, 7 (1982), 807 – 815.
17. V. Popa, Almost continuous multifunctions, Mat. Vesnik, 6 (19), (34) (1982), 75 – 84.
18. V. Popa, Multifuncții slab continue definite pe spații bitopologice (Weak continuous multifunctions defined on bitopological spaces), Stud. Cerc. Mat. 34, 6 (1982), 561 – 567.
19. V. Popa, Multifuncții tari continue (Strong continuous multifunctions), Bul. St. Tehn. Inst. Politehn. “Traian Vuia”, Timișoara, Ser. Mat. Fiz. 27 (41), 1 (1982), 5 – 7.
- 1983**
20. V. Popa, Asupra unor condiții de continuitate pentru multifuncții (On some continuity conditions for multifunctions), Stud. Cerc. Mat. 35, 1 (1983), 46 – 51.
21. V. Popa, Asupra unor condiții suficiente de cvasicontinuitate superioară (On some sufficient conditions of superior quasicontinuity), Studii și Comunicări Șt. I. I. S. Bacău (1983), 119 – 123.
22. V. Popa, Asupra unor multifuncții care păstrează conexiunea dintre mulțimi (On some multifunctions that keeps the connexion between sets), Studii și Comunicări Șt. I. I. S. Bacău (1983), 109 – 116.
23. V. Popa, Some properties of almost continuous multifunctions, Mat. Vesnik, 35 (1983), 425 – 432.
- 1984**
24. V. Popa, On some weakened forms of continuity for multifunctions, Mat. Vesnik 36 (1984), 339 – 350.
- 1985**
25. V. Popa, Unele caracterizări ale multifuncțiilor cvasicontinue și slab continue (Some characterizations of quasi – and weak continuous multifunctions), Stud. Cerc. Mat. 37, 1 (1985), 77 – 82.
26. V. Popa, Sur certaines formes faibles de continuité pour les multifunctions, Rev. Roumaine Math. Pure Appl. 30 (1985), 539 – 546.
27. V. Popa, On characterizations of feebly continuous functions, Mathematica, 27 (1985), 167 – 170.
28. V. Popa, On almost continuous multifunctions, Rev. Research, Math. Sciences, Novi Sad Univ., 15, 1 (1985), 145 – 154.

1986

29. V. Popa, Quasi proper sets and quasi almost continuity in bitopological spaces, Stud. Cercet. Bacău (1986), 185 – 187.

1987

30. V. Popa, Properties of H – almost continuous functions, Bull. Math. Soc. Sci. Math. R. S. Roumanie, 31 (79), 2 (1987), 163 – 168.
31. V. Popa, Asupra unei relații comune pentru unele forme de continuitate (On a common relation for some continuity forms), Stud. Cerc. Șt. Bacău (1987), 80 – 83.
32. V. Popa, Characterizations of H – almost continuous functions, Glasnik Mat. 22 (42) (1987), 157 – 161.
33. V. Popa, On the almost continuity of the limits for sets of multifunctions, An. Univ. Timișoara, Ser. Matem. 25, 2 (1987), 71 – 78.

1988

34. V. Popa, On characterizations of irresolute multifunctions, J. Univ. Kuwait (Sci.), 15 (1988), 21 – 26.
35. V. Popa, Funcții T_i – slab continue (T_i – weak continuous functions), Lucrările Ses. Jubiliare de comunicări Științifice Iași, Vol. 5 (1988), 173 – 176.
36. V. Popa, Some properties of semi – weakly continuous mappings, Stud. Cerc. Mat. 40, 6 (1988), 523 – 528.
37. T. Noiri and V. Popa, Weakly quasicontinuous multifunctions, Anal. Univ. Timișoara, Ser. Mat. 26, 2 (1988), 33 – 38.

1989

38. V. Popa, Sur les multifonctions faiblement continues et H – presque continue, Demonstratio Math. 22, 2 (1989), 273 – 283.
39. V. Popa and T. Noiri, On weakly quasicontinuous functions, Glasnik Matem. 24 (44) (1989), 381 – 399.
40. V. Popa, Some properties of rarely continuous multifunctions, Lucrările Conf. Naționale de Geometrie și Topologie, Suceava, 6 – 9 octombrie 1988, Univ. Al. I. Cuza Iași, 1989, 269 – 274.

1990

41. T. Noiri and V. Popa, On some forms of continuity for multifunctions, Res. Report Yetsushiro Nat. College Tech. 12 (1990), 65 – 70.
42. V. Popa, On almost quasicontinuous functions, Lucrările Științifice, Ser. Mat. Fiz. IPG – Ploiești (1990), 64 – 70.
43. V. Popa, On some properties of quasi semi-separate spaces, Lucrările Științifice, Ser. Mat. Fiz. IPG – Ploiești (1990), 71 – 76.
44. V. Popa, Some properties of H – almost continuous multifunctions, Problemy Matematyczne, 1 (1988), 9 – 26 (appeared in 1990).
45. T. Noiri and V. Popa, Weak forms of faint continuity, Bull. Math. Soc. Sci. Mat. R. S. Roumanie, 34 (82), 3 (1990), 263 – 270.
46. V. Popa, Irresolute multifunctions, Intern. J. Math. Math. Sci. 13 (1990), 275 – 280.
47. V. Popa, Properties of rarely continuous functions, Mathematica, 32 (55), 1 (1990), 77 – 80.
48. V. Popa, On feebly continuous functions, Studia Univ. Babeș – Bolyai, Ser. Math. 35, 1 (1990), 25 – 29.

49. V. Popa, Some properties of almost feebly continuous functions, *Demonstratio Math.* 23, 4 (1990), 985 – 991.
50. V. Popa, Weak continuity and almost continuity for multifunctions, *Sb. Rad. Prisd Mat. Fac. Ser. Mat.* 20, 1 (1990), 185 – 193 (Novi Sad).

1991

51. V. Popa, On weak forms of continuity of multifunctions, *Stud. Cerc. Şt. Univ. Bacău*, 1 (1991), 89 – 91.
52. T. Noiri and V. Popa, Some properties of quasicontinuous functions, *Anal. Univ. Timișoara*, 29, 1 (1991), 65 – 71.
53. V. Popa and T. Noiri, Some properties of irresolute multifunctions, *Mat. Vesnik* 43 (1991), 11 – 17.
54. V. Popa, A note on weakly and almost continuous multifunctions, *Zb. Rad. Prisd Mat. Fac. Ser. Mat.* 21, 2 (1991), 31 – 38.

1992

55. T. Noiri and V. Popa, On strongly irresolute multifunctions, *Res. Report Yatsushiro Nat. College Techn.* 14 (1992), 75 – 79.
56. V. Popa and T. Noiri, On upper and lower weakly quasi – continuous multifunctions, *Rev. Roumaine Math. Pure Appl.* 37, 6 (1992), 499 – 508.

- 74. V. Popa, A general fixed point theorem for weakly compatible mappings in compact metric spaces, *Turkish J. Math.* 25, 4 (2001), 465 – 474.
- 75. V. Popa, Some fixed point theorems for weakly compatible mappings, *Radovi Mat.*, 10, 2 (2001), 245 – 252.
- 76. V. Popa, Coincidence points of compatible mappings satisfying an implicit relation, *Stud. Cerc. Șt. Ser. Mat., Univ. Bacău*, 11 (2001), 159 – 163.
- 77. V. Popa, A general fixed point theorem for compatible mappings of type (P), *Stud. Cerc. Șt. Ser. Mat., Univ. Bacău*, 11 (2001), 153 – 157.

2002

- 78. V. Popa, Coincidence and fixed points for non continuous hybrid contractions, *Nonlinear Analysis Forum*, 7 (2) (2002), 153 – 158.
- 79. V. Popa, Fixed point theorems for mappings in d – complete topological spaces, *Math. Moravica*, 6 (2002), 87 – 92.
- 80. V. Popa, A general fixed point theorem for mappings in pseudocomplex Tychonoff spaces, *Mat. Moravica*, 6 (2002), 93 – 96.
- 81. V. Popa, Fixed points for non – surjective expansion mappings satisfying an implicit relation, *Bul. Șt. Univ. Baia Mare, Ser. Mat. Inform.*, 18, 1 (2002), 105 – 108.

82. V. Popa, A general fixed point theorem for expansion mappings in pseudo – compact spaces, Bull. Inst. Politeh. Iași, 48 (52), 3 – 4 (2002), 7 – 10.

2003

83. V. Popa, Some fixed point theorems in Hilbert spaces for mappings satisfying an implicit relation, Bull. U.P.G. – Ploiești, Ser. Mat. Inform. Fiz., 55, 1 (2003), 1 – 4.
84. V. Popa, Some general fixed point theorems in Hausdorff spaces, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 12 (2002), 179 – 188.
85. V. Popa and C. Berceanu, A general fixed point theorem for pair of orbitally continuous mappings, Anal. Univ. “Dunărea de Jos”, Galați, Ser. Mat. Fiz. Mec. Teor., Fasc. II, 21 (26) (2003), 57 – 65.
86. V. Popa, On some fixed point theorems satisfying a new type of implicit relation, Math. Moravica, 7 (2003), 61 – 66.
87. V. Popa and C. Berceanu, On common coincidence points for pair of mappings satisfying an implicit relation, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 13 (2003), 125 – 132.
88. V. Popa, On some fixed point theorems for multivalued mappings, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 13 (2003), 133 – 137.

2004

89. V. Popa, A general common fixed point theorem of Meir and Keeler type for noncontinuous weak compatible mappings, Filomat, 18 (2004), 33 – 40.
90. V. Popa, A general fixed point theorem for multifunctions satisfying a new type of implicit relation, Anal. Univ. “Dunărea de Jos”, Galați, Ser. Mat. Fiz. Mec. Teor., Fasc. II, 2, 22 (27) (2004), 23 – 26.
91. V. Popa, A general fixed point theorem for weakly δ – compatible mappings in compact metric spaces, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 14 (2004), 125 – 134.
92. V. Popa, Stationary points for multifunctions on two complete metric spaces, Math. Moravica, 8, 1 (2004), 33 – 38.

2005

93. V. Popa, A generalization of Meir – Keeler type common fixed point theorem for four noncontinuous mappings, Sarajevo J. Math., 1 (13) (2005), 135 – 142.
94. V. Popa, A general common fixed point theorem of Meir – Keeler type for weakly compatible mappings, Carpathian J. Math., 21, 1 – 2 (2005), 109 – 114.
95. V. Popa, A general fixed point theorem for four weakly compatible mappings satisfying an implicit relation, Filomat, 19 (2005), 45 – 54.
96. V. Popa and A.-M. Patriciu, Two fixed point theorems for noncontinuous weak compatible and weak** commuting mappings, Anal. Univ. “Dunărea de Jos”, Ser. Mat. Fiz. Mec. Teor., Fasc. II, 23 (28) (2005), 81 – 85.
97. V. Popa, A general fixed point theorem for two pairs of mappings on two metric spaces, Novi Sad J. Math., 35, 2 (2005), 79 – 83.
98. V. Popa, Fixed point theorems for mappings satisfying a new type of implicit relation, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 15 (2005), 123 – 128.
99. V. Popa, A general fixed point theorem under strict implicit contractive condition, Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, 15 (2005), 129 – 133.
100. V. Popa, A fixed point theorem for four weakly compatible mappings in compact metric spaces, U.P.B. Sci. Bull. Ser. A, 67, 3 (2005), 35 – 40.

2006

101. V. Popa and M. Telci, Fixed point theorems for mappings satisfying an implicit relation on two metric spaces, *Math. Balkanica*, 20, 2 (2006), 143 – 152.
102. V. Popa, A general common fixed point theorem for noncontinuous weakly compatible mappings, *Bull. Inst. Politehnic Iași Ser. Mat. Mec. Teor. Fiz.*, 52 (56), 1 – 2 (2006), 15 – 23.
103. V. Popa and A.-M. Patriciu, A general fixed point theorem for multifunctions in d – complete symmetrizable spaces, *Anal. Univ. “Dunărea de Jos”, Ser. Mat. Fiz. Mec. Teor.*, Fasc. II, 24 (29) (2006), 37 – 40.
104. V. Popa, Well posedness of fixed point problem in orbitally complete metric spaces, *Stud. Cerc. Șt. Ser. Mat., Univ. Bacău, Suppl.* 16 (2006), 209 – 214.

2007

105. V. Popa, On Frigon – Granas type multifunctions satisfying an implicit relation, *Demonstratio Math.*, 40, 4 (2007), 907 – 912.
106. V. Popa, A general selection theorem for multivalued functions satisfying an implicit relation, *Fixed Point Theory*, 8, 2 (2007), 297 – 301.
107. V. Popa, A general fixed point theorem for converse commuting multivalued mappings in symmetric spaces, *Filomat*, 21, 2 (2007), 261 – 265.
108. V. Popa and M. Mocanu, A new viewpoint in the study of fixed points for mappings satisfying a contractive condition of integral type, *Bul. Inst. Politehnic Iași Ser. Mat. Mec. Teor. Fiz.*, 53 (57), 5 (2007), 269 – 282.
109. V. Popa, Two coincidence and fixed point theorems for hybrid strict contraction, *Math. Moravica*, 11 (2007), 79 – 83.
110. V. Popa, A general fixed point theorem for expansive mappings under strict implicit relations, *Stud. Cerc. Șt. Ser. Mat., Univ. Bacău*, 17 (2007), 197 – 200.
111. V. Popa, Coincidence points for multivalued mappings in compact metric spaces, *Stud. Cerc. Șt. Ser. Mat., Univ. Bacău*, 17 (2007), 201 – 206.

2008

112. V. Popa, A common fixed point theorem for two multifunctions defined on closed ball, *Fasciculi Math.*, 39 (2008), 63 – 69.
